## WORK EXPERIENCE

Dates

**April 2016 - ONGOING**

Occupation or position held

**Co-Chair of the Constrained RESTful Environments (CoRE) Working Group**

Main activities and responsibilities

The IETF is a large open international community concerned with the evolution of the Internet architecture and the smooth operation of the Internet. The CoRE WG focuses in particular on the Constrained Application Protocol (CoAP), a specialised web transfer protocol for constrained devices, and other technologies for the Internet of Things.

Employer

Internet Engineering Task Force (IETF), <https://datatracker.ietf.org/wg/core/charter/>

Type of business or sector

Internet of Things Standardization

Dates

**March 2014 - ONGOING**

Occupation or position held

**IPSO Smart Objects Chair / Main contributor**

Main activities and responsibilities

Data semantics are the key for building M2M or IoT systems, and are key in the interoperability of devices and services. The main task on chairing the committee is to drive completion of current work items in order to define and publish SmartObjects technical guidelines compatible with both CoAP and LWM2M. Occupation or position held

**Senior Researcher – Services, Media and Networks**

Main activities and responsibilities

- Research on Internet of Things (IoT). Leading Ericsson Research from the IoT Device Management perspective. Standardizing our solutions in the Capillary Networks area and contributing to Ericsson's patent portfolio.
- During my time as researcher in Ericsson I have authored more than [15 patents](#). The areas of the inventions are **Internet of Things** and **Distributed Systems**.
- First prize at the ICT Showroom competition. Tutoring selected Åbo Akademi Aalto on students on two different winning IoT projects.
- Worked as coordinator on several external European and Finnish projects in several roles: FP7 COMMUNE
- Worked as architect on internal IoT project developing a solution for Low Energy IoT Device Management.
- Evolved Capillary Networks prototype demo in the MWC15.
- Managed an industrial designer for a prototyping project. This involved ideation, funding and creation of a 3D printed sensor hardware components.
- Worked in device design and prototype manufacture for a Distributed Sensor and Actuator Network.
- Implementation and research in the Internet of Things (IoT), OMA Lightweight M2M (LWM2M), Constrained Application Protocol (CoAP), ZigBee, Wireless Sensor Networks and embedded devices area.
- Implementing a prototype for the decentralization of Session Initiation Protocol (SIP) telecommunications.
- Supervised 5 Master's Theses students.
